Training

We believe in empowering our staff.

It is therefore our policy to invest in our staff through training and knowledge in order to enable sustainability in terms of growth for both the organization and our staff. We are aware of the necessity of expanding the knowledge bases of our personnel in order to ensure reliable maintenance and support for our clients. Ongoing training in the relevant disciplines will ensure a staff corps armed with the most updated knowledge in their field. This, in turn, will guarantee the quality of installations, maintenance and upgrading of existing installations.

Recruitment and employment

We are in compliance with the Government Broad Based Black Empowerment requirement in the terms of employment equity and management control. It is our policy to recruit and employ people from the historically disadvantaged communities. Experience, credibility and trustworthiness are key to the functioning of our company and thus forms an important part of our selection and employment criteria. Staff is taken through an intense induction program to insure stability and understanding of our vision, values and corporate culture.

Procurement and Social Responsibility

It is our policy to procure from the suppliers who are BEE compliant.

We will at all times work very closely with communities where we operate in order for us to contribute to the social upliftment of the community. Corporate social investment is a priority of our organization. Our strategic approach is to ensure value creation for all stakeholders on an ongoing basis and in line with our business objectives.
